(54) Title: **METHOD FOR PROCESSING CEREAL MATERIAL**

(57) Abstract: There is disclosed a method for processing cereal material that allows for a reduction of time required for steeping and a reduction in the number of unit operations in comparison to conventional corn wet milling. The method involves continuously and simultaneously having solvent absorbed by a cereal material and abrading the cereal material. There is disclosed also the use of products of the process in the production of fermentation feedstock. There is also disclosed use of products of the process as fermentation feedstock.
